

13 Cubic Dongfeng Garbage Dump Truck 4x2 Waste Management Dump Truck

Our Product Introduction

for more products please visit us on vehicle-automobile.com

Basic Information

- Place of Origin: China
- Brand Name: Dongfeng washing sprinkler 4x2 diesel oil 13 cubic rear drive
- Model Number: Dongfeng washing sprinkler 4x2 diesel oil 13 cubic rear drive
- Minimum Order Quantity: 1
- Price: 40000-60000dollar
- Packaging Details: entire car
- Delivery Time: 5-8week
- Payment Terms: T/T
- Supply Ability: 1000

Product Specification

- Brakes: Air
- Engine: Diesel
- Model: Garbage Dump Truck
- Size: Large
- Tire Brand: Michelin
- Transmission: Automatic
- Highlight: Dongfeng Garbage Dump Truck, 13 Cubic Garbage Dump Truck, 13m3 Waste Management Dump Truck

Product Description

Dongfeng washing sprinkler 4×2 diesel oil 13 cubic rear drive

Main technical parameters

Engine model: D6.7NS6B230/B6.2NS6B210,

Engine power: 169/154 (kW/hp),

Pump model: 65QZB-50/110N,

Operating speed (km/h): 5 ~ 20,

Low-pressure duckbill sprinkler width (m): ≥ 14 ,

Low voltage hedging width (m): ≥ 24 ,

Range (m) of low-pressure tail platform spray gun: ≥ 35 ,

Low pressure sprinkler water flow (m³/h): 50,

Maximum lift of water pump (m): 110,

Water absorption depth (m): 6.5,

Tank volume (m³): 12.7,

Maximum speed (km/h): 89,

Vehicle kerb mass (kg): 7690,

Maximum total mass (kg): 18,000,

Rated load mass (kg): 10285,

Overall dimensions (length× width× height) (mm): 7980× 2510× 2950,

Wheelbase (mm): 4500,

Approach angle (°): 8,

Departure angle (°): 12,

Tyre size: 10.00R20 18PR.

Top side greening watering system, arrow light, rear greening left and right side spraying, water pipe reel, reversing monitoring system.

Product introduction

1. Functional overview

The main functions of the cleaning vehicle include flushing, duckbill sprinkling and water cannon sprinkling, and it has the functions of sprinkling water, dust suppression, high and low positions.

Green spraying, pesticide spraying and other functions, but also with water transport, drainage, emergency fire fighting and other functions.

2. Scope of application

This product has a wide application range and low requirements for environmental conditions, and is suitable for all kinds of road washing, sprinkling and cleaning operations, trees,

Green belts, lawn greening and watering operations, construction of roads, factories and mines, etc.

3. Beautiful appearance.

The appearance is simple, smooth, elegant and generous.

4. The tank is durable.

The tank body is made of Q345B, with a thickness of 4mm and strong structural rigidity. The tank body and partition plate are equipped with manholes larger than 500mm, and the head of the tank body adopts new spinning equipment to ensure the reliability and durability of the tank body. The tank body is sandblasted with large sandblasting equipment to eliminate welding stress and increase adhesion, and the interior of the tank body is sprayed with antirust primer, which is corrosion-resistant and durable.

5. The tank has large volume and long continuous operation time.

The water tank has a large volume, up to 12.7 m, reaching the leading volume level of industrial products, with long continuous operation time and convenient use.

6. Various functions to meet different operation requirements.

The whole vehicle is equipped with front duckbill sprinkler, rear hedge, rear shower, rear water cannon, hand-held spray gun, top side greening watering system, etc., and a driving recorder with satellite positioning function is installed.

The front part of the vehicle is equipped with an omni-directional adjustable double-sided duckbill water spraying device (pneumatic control), and the rear part is equipped with a 360-degree adjustable pavement hedging device. An operation platform is arranged at the rear of the vehicle, and a water cannon is arranged on the platform, and the water cannon can adjust the forms of columnar spraying and mist spraying. The tail of the vehicle is equipped with a sprinkling bucket (manual operation) for spraying dust on the road surface. Optional top side greening watering system (pneumatic control), rear greening left and right side spraying (manual control), arrow lamp and water pipe reel.

7. The fittings of special devices are selected from international and domestic famous brands with reliable quality.

The low-pressure water pump adopts Hangzhou Weilong water pump. Electrical components are made of well-known brands in China, electromagnetic valves are made of Yadeke brand, and pneumatic cut-off valves are made of Yester brand, with safe and reliable quality.

The vehicle is equipped with a low water level acousto-optic alarm system, which plays a prompt role for the operator and reduces the probability of damage to the water pump due to long-term water-free operation.

Tail fence, top side greening irrigation system, etc. are all fabricated designs, which are convenient to install and replace. The handrail of the tail platform is bus-style, which is both beautiful and generous.

8. A control box with electric combined control technology is set in the cab. The operator can control the functions such as front duckbill watering, back hedging and top greening watering in the cab, and each function can run independently, which is safe and convenient to operate.
