

100Kw Refrigerated Truck MT82 Ford Transit Reefer Van White

Our Product Introduction

for more products please visit us on vehicle-automobile.com

Basic Information

- Place of Origin: China
- Brand Name: Transit
- Model Number: Ford Transit refrigerated cargo and medicine transport truck diesel two-wheel drive 4x2 manual transmission/automatic transmission
- Minimum Order Quantity: 1 vehicle
- Price: \$35,000-\$40,000Dollar
- Packaging Details: Complete vehicle
- Delivery Time: 5-8 work days
- Payment Terms: T/T
- Supply Ability: 1000 vehicle

Product Specification

- Lighting: LED
- Type: Refrigerated Truck
- Model: Ford Transit Reefer Van
- Color: White
- Highlight: 100Kw Refrigerated Truck,
Refrigerated Truck MT82,
100Kw Ford Transit Reefer Van

Product Description

Ford Transit refrigerated cargo and medicine transport truck diesel two-wheel drive 4x2 manual transmission/automatic tr

A refrigerated truck, also known as a reefer truck or freezer truck, is a specialized commercial vehicle designed to transport perishable goods and maintain a controlled temperature environment.

The key feature of a refrigerated truck is its insulated cargo compartment, which is equipped with a refrigeration unit. The insulation helps to minimize heat transfer, while the refrigeration unit actively cools the compartment to the desired temperature. This allows perishable items such as food, pharmaceuticals, and other temperature-sensitive goods to be transported while preserving their freshness and quality.

Refrigerated trucks come in various sizes and configurations to accommodate different cargo capacities and transportation needs. They can range from small vans to large trailers or semi-trailers. The size and design depend on factors such as the volume of goods to be transported and the specific requirements of the industry.

The refrigeration unit in a refrigerated truck is typically powered by an independent power source, such as a separate diesel engine or an electric motor. This ensures that the cooling system operates continuously, even when the truck's main engine is turned off. It allows for temperature control throughout the entire transportation process, including loading, unloading, and while in transit.

The temperature inside the cargo compartment can be adjusted and maintained based on the specific requirements of the goods being transported. The refrigeration unit typically includes controls for setting the desired temperature range and monitoring the internal conditions. Some advanced systems may also provide real-time temperature tracking and remote monitoring capabilities.

Refrigerated trucks often incorporate additional features to ensure the safety and integrity of the cargo. This may include features such as multiple access doors to minimize temperature fluctuations during loading and unloading, temperature alarms to alert the driver to any deviations from the set temperature, and secure tie-down systems to prevent cargo shifting during transit.

In summary, a refrigerated truck is a specialized commercial vehicle designed for transporting perishable goods while maintaining a controlled temperature environment. It features an insulated cargo compartment and a refrigeration unit to keep the cargo at the required temperature. Refrigerated trucks play a crucial role in industries such as food and pharmaceuticals, enabling the safe and efficient transportation of temperature-sensitive products.

car model	Jiangling
Displacement (L)	2.2
Emission Standards	Country V
Number of passengers in the cab	3-6 people
Overall vehicle size (mm)	4963×1974×2450
Wheelbase (mm)	2933
Axle load:	1580/1970
Front wheelbase (mm)	1745
Rear wheelbase (mm)	17000
Total mass (KG)	3550
Curb weight (KG)	2530
Fuel type	diesel fuel
engine model	DURATORQ4D225H
Engine power (Kw)	100
Transmission model	MT82
suspension system	MacPherson independent front suspension, Hotchkiss rear suspension
Body structure	Load-bearing
Tire specifications	215/75R16LT
air conditioner	Heating and cooling air conditioning
central locking	have
Reversing radar	have
Anti-lock braking system	ABS
Maximum speed (km/h)	120
color	White
Refrigerated compartment configuration	1. Fiberglass reinforced composite panel (FRP) panel, rigid polyurethane material insulation layer.
