

850 Engine Ford Refrigerated Truck Ford Transit Refrigerated Van

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Fushunt
- Model Number: Ford's new Transit refrigerated cargo and medicine transport truck diesel 4x2 front-wheel drive manual/automatic transmission
- Minimum Order Quantity: 1 vehicle
- Price: \$35,000-\$40,000Dollar
- Packaging Details: Complete vehicle
- Delivery Time: 5-8 work days
- Payment Terms: T/T
- Supply Ability: 1000 vehicle

Product Specification

- Alarms: Yes
- GPS Tracking: Yes
- Insulation: Yes
- Interior Lighting: Yes
- Power Source: Electric/Diesel
- Type: Refrigerated Truck
- Highlight: 850 Engine Ford Transit Refrigerated, Ford Transit Refrigerated Van, 850 Engine Ford Refrigerated

Product Description

Ford's new Transit refrigerated cargo and medicine transport truck diesel 4x2 front-wheel drive manual/automatic transmi

A refrigerated truck, also known as a reefer truck or freezer truck, is a specialized commercial vehicle designed to transport perishable goods and maintain a controlled temperature environment.

The key feature of a refrigerated truck is its insulated cargo compartment, which is equipped with a refrigeration unit. The insulation helps to minimize heat transfer, while the refrigeration unit actively cools the compartment to the desired temperature. This allows perishable items such as food, pharmaceuticals, and other temperature-sensitive goods to be transported while preserving their freshness and quality.

Refrigerated trucks come in various sizes and configurations to accommodate different cargo capacities and transportation needs. They can range from small vans to large trailers or semi-trailers. The size and design depend on factors such as the volume of goods to be transported and the specific requirements of the industry.

The refrigeration unit in a refrigerated truck is typically powered by an independent power source, such as a separate diesel engine or an electric motor. This ensures that the cooling system operates continuously, even when the truck's main engine is turned off. It allows for temperature control throughout the entire transportation process, including loading, unloading, and while in transit.

The temperature inside the cargo compartment can be adjusted and maintained based on the specific requirements of the goods being transported. The refrigeration unit typically includes controls for setting the desired temperature range and monitoring the internal conditions. Some advanced systems may also provide real-time temperature tracking and remote monitoring capabilities.

Refrigerated trucks often incorporate additional features to ensure the safety and integrity of the cargo. This may include features such as multiple access doors to minimize temperature fluctuations during loading and unloading, temperature alarms to alert the driver to any deviations from the set temperature, and secure tie-down systems to prevent cargo shifting during transit.

In summary, a refrigerated truck is a specialized commercial vehicle designed for transporting perishable goods while maintaining a controlled temperature environment. It features an insulated cargo compartment and a refrigeration unit to keep the cargo at the required temperature. Refrigerated trucks play a crucial role in industries such as food and pharmaceuticals, enabling the safe and efficient transportation of temperature-sensitive products.

Vehicle technical parameters		
1	Body size mm:	5341×2032×2385(length×width×height)
2	engine manufacturer	Jiangling Motors Co., Ltd.
3	Wheelbase mm:	3300
4	Vehicle fully loaded total mass kg:	3510
5	Vehicle curb weight kg:	2480
6	suspension system	The front suspension is non-independent suspension,
7	Approach / departure angle	Rear suspension leaf spring non-independent suspension
8	Front overhang/rear overhang mm	20/25
9	Axle load	1041/1027
10	Number of axes	1635/1875
11	Fuel consumption	2
12	Number of spring leaves	9.8
13	Number of tires	-/2
14	Front wheelbase/rear wheelbase	4
15	Steering Type	1736/1720
16	Minimum ground clearance mm:	steering wheel
17	Minimum turning radius m:	191
18	Fuel type:	6.45
19	Rated mass kg	diesel fuel
20	engine model	850
21	Way of working:	DURATORQ4D206H
22	Exhaust volume ml:	L in-line, four-cylinder, direct injection, 16 valves
23	Rated power kw(hp)/rpm:	1998
24	Maximum torque Nm/rpm:	90/3250
25	Emission Standards:	180/1500-2500
26	Drive mode	National VI
26	transmission:	Front-wheel drive

28	Top speed km/h:	5 speed manual transmission
29	Tire specifications and models	120
30	Braking System	215/75R16LT
31	Environmental protection standards	Front disk and rear disk
32	Rated passenger capacity (including driver)	GB3847-2005 (National VI),
Main vehicle configuration		
33	All-metal load-bearing body, exterior color is white	
34	multifunctional instrument	
35	manual rear view mirror	
36	Ordinary headlight	
37	Simple backup tool	
38	Front and rear air conditioners	
39	Manual door lock	
40	cloth seats	
41	The whole car is made of steel wheels, and the full-size steel spare tire	
42	Front manual doors and windows	
43	4-way driver's seat adjustment	
44	Transport medium: vaccines and drugs	
45	Cab original heating and cooling system,	
46	Visual reversing image	
47	Install a driving recorder	
48	ABS system controller	
49	High power refrigeration unit temperature -5° to 18°	
50	The top of the box is closed, and the rear is a double door	
51	The high-strength steel frame of the carriage is anti-corrosion and rust-proof for 10 years. The exterior is decorated with fiberglass and is surrounded by arc treatment.	
52	Thermal insulation, international standard, using polyurethane thermal insulation material covered on both sides	
53	Reflective labels, anti-collision rubber, stainless steel hinge base, support, stainless steel handle, stainless steel lock base,	
54	The body is marked	
55	Interior stainless steel material	
56	The carriage is equipped with ultraviolet disinfection and sterilization equipment
