

Gasoline Cherio Menda Urban Off Road Vehicle SUV Front Wheel Drive

Basic Information

. Place of Origin:

• Brand Name: Cherio Menda

Model Number: Cherio Menda urban off-road vehicle SUV

gasoline 5-seat front-wheel drive 4×2

automatic transmission

• Minimum Order Quantity: 1 vehicle

• Price: 140000-170000 dollar Packaging Details: Complete vehicle Delivery Time: 5-8 work days T/T

• Payment Terms:

1000 vehicle Supply Ability:

Product Specification

Model: Cherio Menda Safety Features: Airbags, Seatbelts

• Seats: 5 • Transmission Type: Manual

· Vehicle Type: Minibus Gasoline Type:

Highlight: Cherio Menda Urban Off Road. Off Road Vehicle SUV Gasoline,

Product Description

Cherio Menda urban off-road vehicle SUV gasoline 5-seat front-wheel drive 4×2 automatic transmission

Paragraph 1: Exterior

An urban SUV typically combines strength and style in its exterior design. It often features a higher ground clearance and larger wheels to handle uneven road surfaces and other challenges in urban environments. The body design is usually more rugged, with a sporty and modern appearance.

Paragraph 2: Size and Space

Urban SUVs are typically more compact than traditional SUVs, making them well-suited for city driving. They are generally shorter in overall length and have a smaller turning radius, making them easier to maneuver on narrow city streets and parking lots. Despite their smaller size, urban SUVs often provide elevated seating positions and ample interior space, offering comfortable seating and sufficient storage capacity.

Paragraph 3: Drive System and Performance

Urban SUVs are typically equipped with front-wheel drive or all-wheel drive systems to provide good handling and stability. Some models may also offer four-wheel drive systems to enhance off-road capability and adapt to harsh weather conditions The powertrain system and performance of urban SUVs can vary depending on the model, allowing for different engine options based on personal preferences and performance needs.

Paragraph 4: Suspension System

To cope with uneven road surfaces in urban environments, urban SUVs are often equipped with robust suspension systems. This helps provide a good suspension travel and damping effect, reducing the impact of road bumps on passengers. Paragraph 5: Safety and Convenience Features

Urban SUVs typically come with various safety and convenience features such as anti-lock braking systems (ABS), traction control systems (TCS), electronic stability control (ESC), and rear parking sensors or cameras. These features contribute to improved driving safety and convenience.

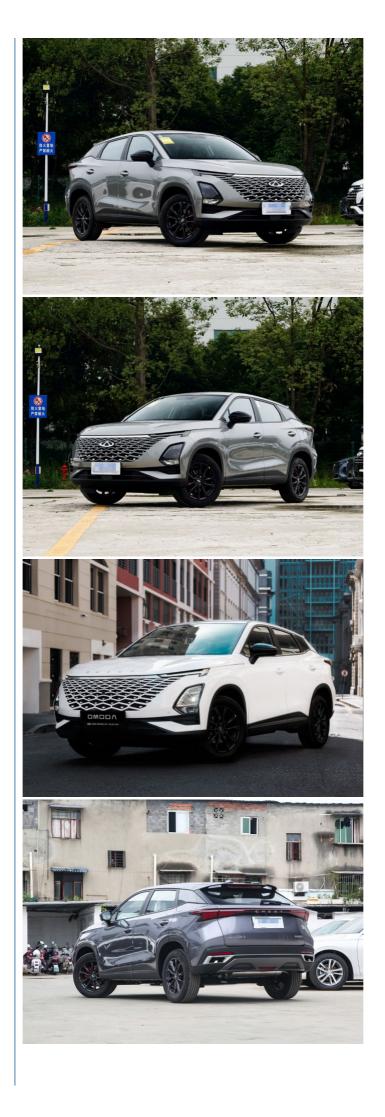

Summary: An urban SUV is a compact SUV designed for city driving. It features a rugged exterior, higher ground clearance,
