

# Chery Explores Gasoline 5 Seat Minibus Vehicle SUV Automatic Transmission

### **Basic Information**

. Place of Origin: . Brand Name:

 Model Number: Chery explores four-wheel drive gasoline 5-seat off-road vehicle SUV automatic

transmission 4×4

• Minimum Order Quantity: 1 vehicle

• Price: \$30.000-\$30.000Dollar Packaging Details: Complete vehicle Delivery Time: 5-8 work days T/T • Payment Terms: 1000 vehicle

### **Product Specification**

Supply Ability:

· Capacity: 5 Passengers . Engine:

• Exterior Features: Alloy Wheels, Fog Lights, Rear Spoiler Interior Features: Air Conditioning, Radio, CD Player Safety Features: Airbags, Seatbelts, Child Locks

Transmission: Manual Or Automatic Minibus Vehicle Type: . Highlight: Chery Explores Gasoline, 5 Seat Chery Explores, Chery Explores Minibus Vehicle

# **Product Description**

Chery explores four-wheel drive gasoline 5-seat off-road vehicle SUV automatic transmission 4×4

An urban SUV typically combines strength and style in its exterior design. It often features a higher ground clearance and larger wheels to handle uneven road surfaces and other challenges in urban environments. The body design is usually more rugged, with a sporty and modern appearance.

# Paragraph 2: Size and Space

Urban SUVs are typically more compact than traditional SUVs, making them well-suited for city driving. They are generally shorter in overall length and have a smaller turning radius, making them easier to maneuver on narrow city streets and parking lots. Despite their smaller size, urban SUVs often provide elevated seating positions and ample interior space, offering comfortable seating and sufficient storage capacity.

# Paragraph 3: Drive System and Performance

Urban SUVs are typically equipped with front-wheel drive or all-wheel drive systems to provide good handling and stability. Some models may also offer four-wheel drive systems to enhance off-road capability and adapt to harsh weather conditions. The powertrain system and performance of urban SUVs can vary depending on the model, allowing for different engine options based on personal preferences and performance needs.

### Paragraph 4: Suspension System

To cope with uneven road surfaces in urban environments, urban SUVs are often equipped with robust suspension systems. This helps provide a good suspension travel and damping effect, reducing the impact of road bumps on passengers.

Paragraph 5: Safety and Convenience Features

Urban SUVs typically come with various safety and convenience features such as anti-lock braking systems (ABS), traction control systems (TCS), electronic stability control (ESC), and rear parking sensors or cameras. These features contribute to improved driving safety and convenience.

Summary: An urban SUV is a compact SUV designed for city driving. It features a rugged exterior, higher ground clearance, and a range of drivetrain options to tackle urban challenges. Urban SUVs offer excellent handling, comfortable interior space, and a variety of safety and convenience features, making them a versatile choice for daily commuting and navigating rough road surfaces.
