

Great Wall Haval Off Road Vehicle SUV Gasoline 5-Seater 7-Seater Rear Drive Four Wheel Drive 4x4 Automatic

Our Product Introduction

for more products please visit us on vehicle-automobile.com

Basic Information

- Place of Origin: China
- Brand Name: Fushunt
- Model Number: Great Wall Haval off-road vehicle SUV gasoline 5-seater 7-seater rear drive four-wheel drive 4x4 automatic transmission
- Minimum Order Quantity: 1 vehicle
- Price: \$30,000-\$40,000Dollar
- Packaging Details: Complete vehicle
- Delivery Time: 5-8 work days
- Payment Terms: T/T
- Supply Ability: 1000 vehicle

Product Specification

- Amenities: Bluetooth, Heated Seats, Keyless Entry
- Body Style: 4-door
- Body Type: SUV
- Engine Type: Gasoline/Diesel/Electric
- Exterior Features: Alloy Wheels, Fog Lights, Roof Rack
- Exteriorfeatures: Roof Rack, Running Boards
- Interior Features: Leather Seats, Heated Seats, Sunroof
- Interiorfeatures: Leather Seats, Navigation System
- Number Of Seats: 5-7
- Price Range: \$30,000-\$50,000
- Safetyfeatures: Airbags, Blind Spot Monitoring
- Technology Features: High
- Towing Capacity: 5000-7000 Lbs
- Transmission: Automatic/Manual
- Type: Sports Utility Vehicle

Product Description

Great Wall Haval Off-Road Vehicle SUV Gasoline 5-Seater 7-Seater Rear Drive Four-Wheel Drive 4x4 Automatic Transmission

Certainly! Here's a segmented description of an off-road vehicle, clearly organized:

Vehicle Type and Purpose: An off-road vehicle is a specialized vehicle designed for driving on unpaved roads, rugged terrains, and challenging environments. It is built to handle rough conditions and traverse obstacles that traditional vehicles may struggle with. Off-road vehicles are commonly used for activities such as off-roading, camping, exploration, and outdoor adventures.

Design and Construction: Off-road vehicles feature specific design elements and construction techniques to enhance their performance and durability. They often have a high ground clearance to accommodate uneven terrains and large wheels with aggressive tread patterns for improved traction. The chassis and suspension are reinforced to withstand impacts and provide better off-road capability. Additionally, off-road vehicles may have protective features like skid plates, roll cages, and reinforced bumpers to safeguard critical components.

Four-Wheel Drive System: Most off-road vehicles are equipped with a four-wheel drive (4WD) system to provide enhanced traction and power delivery to all wheels. The 4WD system allows the driver to engage all four wheels simultaneously, providing better control and traction on challenging surfaces like mud, sand, or rocky terrain. Some off-road vehicles also offer selectable drive modes, such as 2WD or automatic mode, for improved fuel efficiency on regular roads.

Off-Road Features: Off-road vehicles often include specialized features to enhance their off-road capabilities. These may include locking differentials or limited-slip differentials that distribute power evenly between wheels, allowing for better traction in challenging conditions. Additionally, off-road vehicles may have advanced suspension systems, such as independent suspension or adjustable height suspension, to improve articulation and wheel travel, ensuring the wheels maintain contact with the ground for optimal traction.

Safety and Protection: Off-road vehicles prioritize safety features to mitigate risks associated with off-road driving. They may incorporate advanced safety technologies like stability control, traction control, and hill descent control to assist the driver in maintaining control on uneven surfaces. Additionally, off-road vehicles often have reinforced frames and roll cages to provide

Our Product Introduction

occupant protection in case of rollovers or accidents.

The above segmented description provides a clear overview of the off-road vehicle, covering its type and purpose, design and construction, four-wheel drive system, off-road features, and safety considerations. This organization helps to understand the key characteristics and functionalities of an off-road vehicle.
